

The Education Company References Demonstrated Effectiveness

The Education Company was worked closely with the faculty, staff, and administration of schools and school districts all across the country. Schools typically receive extensive administrator training as well as staff development for the entire full and part-time staff.

Schools are able to document significant reduction in the number of suspensions, behavioral school referrals, and expulsions. Even more, through intensive training, each school experienced an increased level of consistency in the implementation of proactive strategies to improve the climate of academic achievement within each school.

Please feel free to contact the following school leaders about the impact the Education Company on school climate and culture
